TERMS AND CONDITIONS

WENTWORTH GARDENS, founded because of an appreciation of the beauty of flowers, plans first to give flower lovers the best possible service — and the greatest return for their money.

SHIPMENTS are made as soon as we are certain that conditions are most favorable for transplanting — and that bulbs have ripened to prime condition for storing or bedding — unless otherwise instructed.

TERMS — cash with order please. Our low prices makes this imperative. For reference write — Lakeview State Bank, or any credit agency.

QUANTITY DISCOUNTS — All prices quoted are so low, they do not permit further discounts for large orders, excepting our special bargain combinations.

POSTAGE will be prepaid on all retail orders.

NO ORDERS ACCEPTED for less than \$1.00 or \$.10 per single item.

WHOLESALE PRICES will be quoted only on request written on firm letterhead.

TRUE TO NAME STOCK — All Wentworth Gardens bulbs are guaranteed to be true to color and name. Every transaction will be completed to the entire satisfaction of the customer.

ALL ORDERS SUBJECT TO PRIOR SALE and to change of stock if stock is depleted — but this stipulation has never been resorted to.

GUARANTEE — Wentworth Gardens stands back of every statement made in this catalogue.

GEORGE T. WENTWORTH

ABOUT OURSELVES

Like many other successful enterprises, WENTWORTH GARDENS had its beginning as the hobby of a very busy man. Merton W. Wentworth was the treasurer and business manager of the famous Battle Creek Sanitarium, largest institution of its kind in the world, and he had other extensive business interests calling for his supervision. For rest and recreation, from these numerous business cares, he turned to the cultivation of flowers in the extensive grounds about his suburban home. Early in his experience as an amateur gardener, he was attracted by the striking beauty of the gladiolus and its ease of cultivation.

Before long he became a gladiolus enthusiast, and began experimenting in hybridizing. He developed many hybrids of merit, and established a national reputation in this field.

Then he perfected the Mildred Louise, in all its outstanding beauty — and named it for his only daughter. From the first, this gladiolus won instant recognition from Gladiolus fans — and immediately took three ribbons at the Atlantic City Flower and Garden pageant, and won high honors at the Metropolitan Gladiolus Society Regional exhibit — and many others. And it was given unprecedented favorable publicity and recognition in the flower and garden trade publications throughout the country.

Associated with his father from the very beginning of Wentworth Gardens, George Wentworth worked with him on many of his gladiolus developments. George attended Michigan State College — formerly Michigan Agricultural College — and following the passing of Mr. Wentworth, took over the active management of Wentworth Gardens, placing the business on a commercial basis, improving methods of planting, sorting, and storing, greatly increasing the acreage, and enlarging its scope of usefulness.

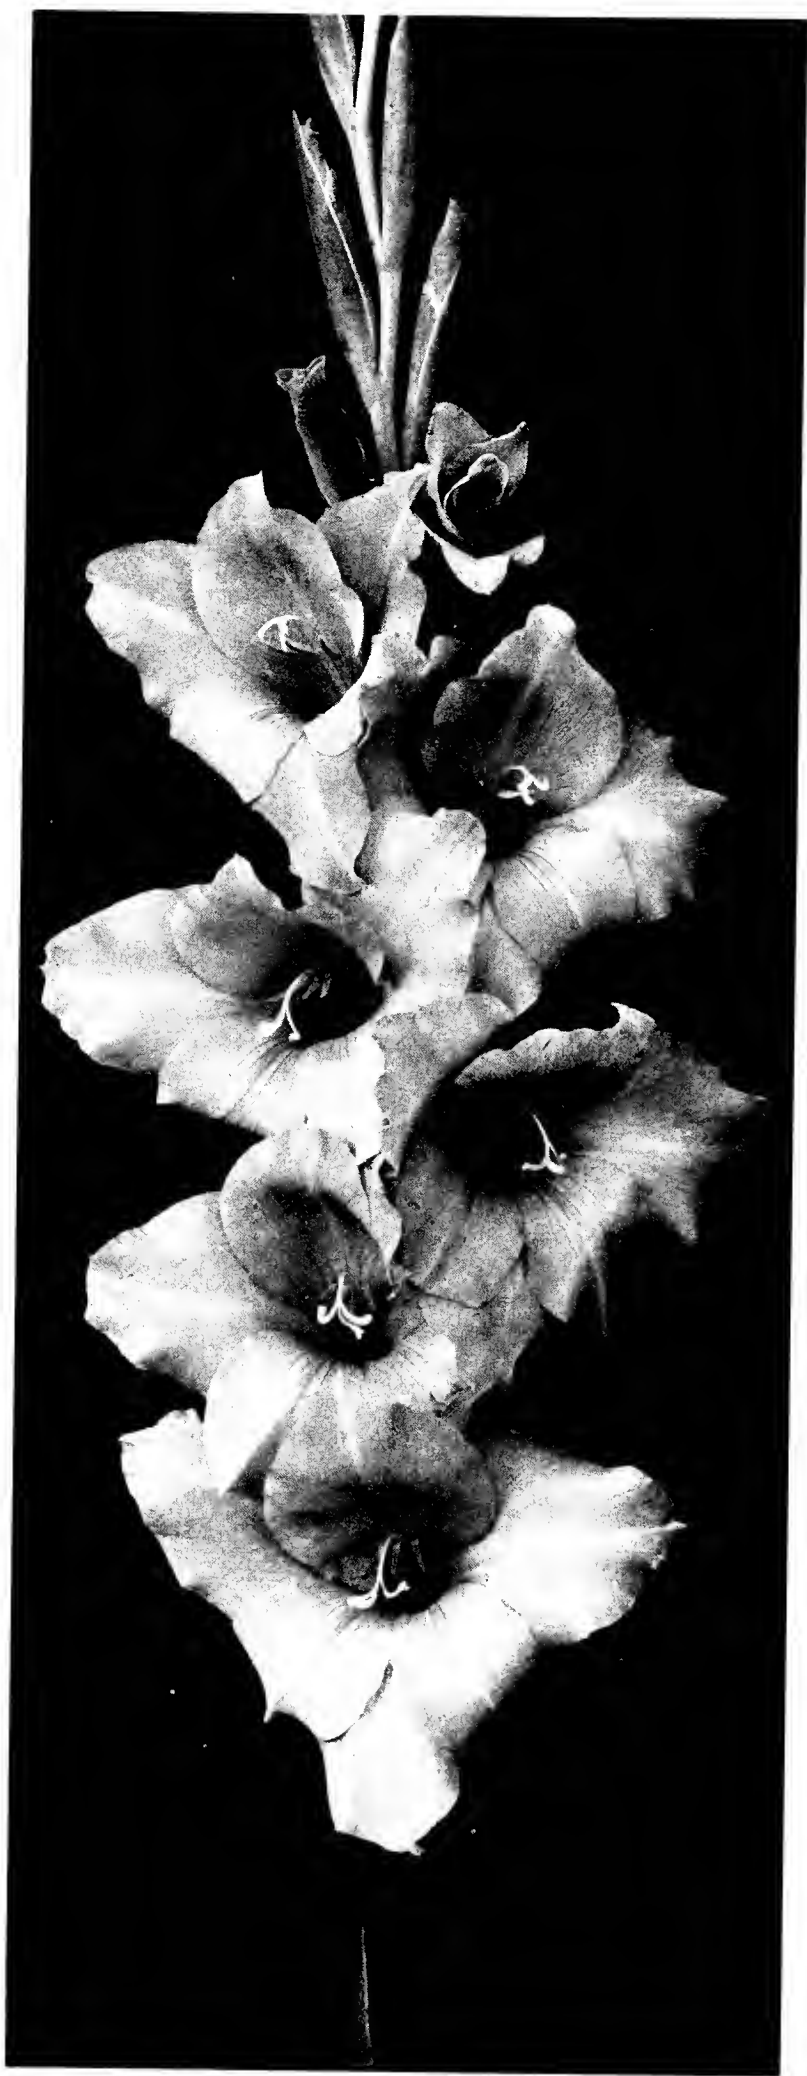

MR. M. W. WENTWORTH

Wentworth Gardens is situated just at the edge of Battle Creek where it has the full advantages of the famous Southern Michigan climatic conditions, long recognized as developing hardy, strong full blooming plants that are disease resisting and give the best results in any climate.

Wentworth Garden bulbs are state inspected and the management is in constant contact during the growing season with the nationally known experts of Michigan State College and our customers receive the benefit of their knowledge and experience.

All gladiolus bulbs listed here are grown in Wentworth Gardens under our expert supervision — and are so cared for during the entire growing season, grading, sorting, storing and fumigating, that we are always able to give our unqualified guarantee with every shipment. You may be assured that everything will be exactly as represented.

GEORGE T. WENTWORTH

MILDRED LOUISE

*The gladiolus originated, disseminated, and featured by
Wentworth Gardens.*

GLADIOLUS

MILDRED LOUISE

This Gladiolus was brought to the attention of the Glad fans by its originator, the late Mr. M. W. Wentworth, of Battle Creek, Michigan. In the fall of 1931, it was exhibited for the first time, being sent to the Metropolitan Gladiolus Show in New York, the Atlantic City Flower and Garden Pageant, the Michigan State Gladiolus Show, and many other flower and garden shows.

This beautiful Gladiolus was not only the outstanding introduction of that year, but has actually been increasing its prestige and popularity with growers and fans ever since.

The prevailing color of this super gladiolus, MILDRED LOUISE, is strawberry pink fading into a soft yellow in the throat. The flower seems to give off a soft glow when cut and taken indoors.

The stem is gracefully strong and flexible. The beautiful, triangular shaped florets open wide, measuring five and one-half inches or more without distortion. There are eighteen to twenty buds on each spike. The florets lie close to the stem, though there is no crowding nor open spaces between them. The petals are firm and of good substance, thus making a bloom of unusual value as a cut flower. The foliage is of a deep sea-green color; the spikes uniformly straight; the stems rarely branched. It is an excellent propagator.

MILDRED LOUISE is an exhibition gladiolus that is at the same time an extremely good shipper, making it especially fine as a commercial flower.

Another very good feature of this Glad is that it blooms on the average of 76 days, while most of the other leading glads are handicapped by being 10 to 20 days later in maturing.

Being the originators of this prize winner, we have plenty of good healthy bulbs to fill your orders to your entire satisfaction.

WENTWORTH GARDENS

GLADIOLUS CULTURE

As Recommended by Michigan Gladiolus Growers
Association

For success with Glads you must do these things:

1st — Buy sound, healthy bulbs.

2nd — Follow the cultural directions given below.

3rd — Store your bulbs properly.

Upon receipt of a shipment of bulbs open the package to admit air. If they arrive before planting time, store in a cool cellar until you are ready to plant.

PLANTING —

Glads may be planted in Michigan from the time the soil is workable in the spring until July 1st. Late planted stock must be stored at a uniform temperature of 40 degrees or less so that they do not sprout in storage. If you have a quantity of bulbs, plant at one or two weeks interval to insure succession of bloom. The number of days from planting to blooming will vary with the variety from about sixty days to over one hundred. Extra early blooms can be secured by starting some bulbs early in pots or flats inside, then planting out when danger of frost is over.

USES —

Glads may be planted in the border or in beds for landscape effects or in rows for cut flowers. Beautiful effects may be secured by working them into the perennial or annual border. Give them as much sun as possible. Do not plant against house foundations.

SOILS —

A sandy loam soil that is well drained is best. Avoid a clay subsoil if possible. Glads, however, will do quite well in most any soil. Incorporate plenty of organic matter such as manure, or leaves and work deeply. The soil can be prepared in either spring or fall. If done in the spring use only well rotted manure or leaf mold. In spading, pulverize the soil thoroughly to a depth of 8 to 10 inches.

PLANTING DISTANCE —

If planted in rows, space rows 18 to 20 inches apart or more. Open a trench with a spade or hoe to a depth of 4 to 5 inches. Make an application of your favorite standard complete fertilizer at the rate recommended by the manufacturer and work well into the soil to mix so that bulbs will not come in contact with the raw fertilizer. Set bulbs with top up 4 to 5 inches apart in the trench. Fill the trench half full of soil and fill in as plants come up.

SUMMER CARE —

Cultivate the soil frequently throughout the summer to keep down weeds, prevent caking, and retain the moisture. Water when necessary by soaking the soil thoroughly. Never sprinkle just to moisten the top soil. Deep watering stimulates healthy root action. A mulch of peat moss will help retain moisture and serve as a food.

Cut the flower spikes when the first bud opens. In cutting leave at least four leaves on the plant to mature the corm. A very satisfactory method is to insert the point of a sharp knife in the stem just puncturing it, then with the thumb opposite and above the knife make a quick bend of the stem toward the knife. It will snap off readily.

DIGGING —

Dig the bulbs carefully when the foliage is turning brown, but always before freezing weather. Cut the stems off close to the bulb and dry the bulbs in the open air for a few days away from frost.

STORAGE —

Store them in a frost-proof cellar or shed for about two weeks to cure them, then remove the old dried up mother corm at the base and remove the cut stem. After cleaning place them in a clean, well ventilated, moderately humid storage cellar. A temperature of forty degrees and a humidity of 70 to 80 per cent is desirable, but a fruit storage cellar can be used satisfactorily. Store the bulbs in shallow open top boxes or flats. If they are stored on top of each other, use a block between them for ventilation.

INSECTS — THRIPS —

Should you unfortunately be bothered with thrip, they are easiest controlled in storage. Place the bulbs in a paper sack and add 1 ounce naphthaline flakes per 100 bulbs. Leave the flakes in the sacks for two weeks then remove them. Keep the bulbs at about 65 degrees during the treatment. Place in storage immediately after treatment. Dipping in corrosive sublimate 1 ounce to 7½ gallons, also has proved satisfactory. A good spray for control in the garden includes: 3½ ozs. lead arsenate, 4 ozs. Derrisol, 1 lb. glue and 10 gals. water. Spray twice a week for two weeks.

DISEASES —

Scab and dry rot are the only important diseases of Glads. They can be controlled by planting on clean well drained soil and dipping the bulbs in corrosive sublimate 1 oz. in 7½ gallons. Add 1/3 the original amount of corrosive sublimate to the solution for the dip, then discard the solution.

We Recommend to You—

AS has been our custom in years before to suggest or RECOMMEND certain varieties to our customers we again provide this service.

WENTWORTH GARDENS have large test gardens where we watch all new and better varieties and we are for this reason well able to RECOMMEND what we consider the best varieties among the newest kinds.

FOR YOUR APPROVAL

MILDRED LOUISE

This variety is one of the very newer better varieties. It is a beautiful Strawberry pink which seems to give off a soft warm glow. The spike head has 20 or more buds on it, all well placed. The stems rarely crook. It's one of the show flowers you will want in your garden.

	No. 1	2	3	4	5	6	Blts.
1	\$.40	.35	.30	.25	.20	.15	.05

100	24.00	20.00	16.00	12.00	10.00	9.00	4.00

PICARDY

A delicate shrimp pink variety of truly wonderful habits. This variety is a show flower of great repute and is priced way below its true value. If you have it now you will want more but if not don't fail to grow it next year.

	No. 1	2	3	4	5	6	Blts.

100	8.00	6.00	4.00	3.00	2.00	1.40	Qt. 6.00

RED PHIPPS

A glowing bright red. This Gladiolus will attract more attention than any other one in your house or garden. Five to eight open at once and all florets well placed. It's worth having.

	No. 1	2	3	4	5	6
1	\$.15	.12	.10	.08	.05	.04

100	9.60	8.00	6.40	4.80	3.20	2.40

MAID OF ORLEANS

This is a new white variety with a light cream throat. It has a good start toward the most popular white. It has a tall straight spike with beautifully shaped florets. Don't turn this one down.

	No. 1	2	3	4	5	6	Blts.
1	\$.18	.15	.12	.10	.08	.06	100 .80

WE ALWAYS SEND THE LARGEST SIZE POSSIBLE IN THE SIZE YOU BUY.

AFLAME

Large flowering variety of a Begonia Rose color.

Large (2-12c, 10-50c); Medium (10-30c); Small (10-15c).

AIDA

One of the best blues. Has very deep rich color of a violet blue.

Large (2-12c, 10-50c); Medium (10-30c); Small (10-15c).

ALBANIA

Pure white variety of good form.

Large (2-10c, 10-40c); Medium (10-25c); Small (10-15c).

ALBATROSS

Brilliant pure white with lily like florets. Known by many as the best white yet. Very tall and strong with large flowers.

See page 9 for complete description and prices.

Large (1-10c, 10-70c); Medium (2-10c, 10-40c); Small (10-25c).

AMADOR

Excellent glowing red variety of great merit. New and a true show variety.

Large (25c, 10-\$2.00); Medium (15c, 10-\$1.20); Small (10c, 10-80c).

AVE MARIA

Large tall spike of a light blue color. Flowers well placed and well shaped.

Large (2-10c, 10-40c); Medium (10-25c); Small (10-15c).

BAGDAD

Giant gladiolus of a smoky old rose color. One of the best show varieties.

Large (15c, 10-\$1.20); Medium (2-15c, 10-60c); Small (10-30c).

BERTIE SNOW

Lavender color with many well placed flowers. Earlier than Minuet.

Large (2-10c, 10-40c); Medium (10-25c); Small (10-15c).

BETTY NUTHALL

Very tall strong gladiolus of a salmon color. Blooms late and is very good as a cut flower. See page 14.

Large (2-12c, 10-50c); Medium (10-30c); Small (10-15c).

BILL SOWDEN

A very outstanding red. Has large flowers well placed. Gives an attractive spot in your garden.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (10-50c).

BLUE ADMIRAL

Without doubt the very best of the blue varieties. Don't fail to have this one. It's tall, strong and beautiful.

Large (each \$5.00); Medium (each \$3.50); Small (each \$2.00).

BLUE DANUBE

Another outstanding blue variety of good color and length of spike. Will have many open at once all well placed.

Large (12c, 10-\$1.00); Medium (2-15c, 10-60c); Small (10-40c).

BLUE TRIUMPHATOR

Large flowering variety of a very light blue color. Particularly good for decoration.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (10-60c).

CANBERRA

A very good yellow. Will bloom six to ten at once. Very tall vigorous grower.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (10-60c).

COMMANDER KOEHL

Immense very dark scarlet of wonderful size and substance. A real sensation in the garden and on the show bench. It's good.

Large (10c, 10-80c); Medium (2-10c, 10-40c); Small (10-25c).

COPPER BRONZE

Very good for inside decorations. The ladies like it for their sun parlors. Goes very well in a copper bowl.

Large (10c, 10-80c); Medium (2-10c, 10-40c); Small (10-25c).

CHARLES DICKENS

Very tall, vigorous spike. The best one yet in its color class, being purple.

Large (3-15c, 10-40c); Medium (10-20c); Small (15-20c).

DR. F. E. BENNETT

A very brilliant bright red. Very good in every way.

Large (2-12c; 10-50c); Medium (10-25c); Small (15-25c).

DR. MOODY

Early lavender of good habits. Strong straight spike with many florets.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

EMILE AUBURN

A smoky bronze color with a red blotch in the throat. Will bloom 10 and more with ordinary care. Really beautiful in form and color.

Large (2-12c, 10-50c); Medium (10-30c); Small (10-20c).

GIANT NYMPH

Pink with a light yellow or cream throat. A very tall growing kind with good habits.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

GOLDEN DREAM

Excellent yellow of vigorous growth. The flowers are rich in color and round in shape. See page 15 for color reproduction.

Large (2-10c, 10-40c); Medium (10-20c); Small (10-15c).

GRAF ZEPPELIN

Large beautiful red of show table habits.

Large (10c, 10-80c); Medium (2-15c, 10-60c); Small (10-40c).

HEAVENLY BLUE

A very light blue. Large flowers.

Large (2-10c, 10-40c); Medium (10-20c); Small (10-15c).

HINEMOA

The ladies prefer this variety for its odd coloring. It has good habits and a color of its own. A deep rose flaked chocolate and a large yellow blotch in the throat. A novelty.

Large (20c, 10-\$1.80); Medium (12c, 10-\$1.00); Small (10-80c).

JOERG'S WHITE

A creamy white with small red markings in the throat.

Large (2-10c, 10-40c); Medium (10-20c); Small (10-15c).

JONKHERR VAN TETS

Immense white variety. The flowers are very large. It's one of the best white varieties yet introduced.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (2-15c, 10-60c).

KING ARTHUR

One of the newer good gladiolus. A ruffled variety having large open flowers of very heavy substance. The color is a deep rose lavender beautifully mottled.

Large (25c); Medium (15c); Small (10c).

LA POLAMA

A very good orange colored gladiolus. Tall and vigorous in growth.

Large (10c, 10-70c); Medium (10-40c); Small (10-20c).

LAVENDER BRIDE

Tall straight stems, large flowers and a beautiful lavender shading, all tend to make this variety beautiful.

Large (2-10c, 10-40c); Medium (10-20c); Small (10-15c).

LOTUS

A very beautiful cream color with a fringe of light red around the outer petals.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (2-15c, 10-60c).

MADAM M. SULLY

This variety will always be very outstanding wherever shown because of the fact that it is a clear white with a scarlet blotch in its throat.

Large (10c, 10-70c); Medium (10-40c); Small (10-20c).

MARGARET FULTON

New and very outstanding. A beautiful salmon pink of a real glowing color. The flowers are round in shape.

Large (2-25c, 10-\$2.00); Medium (4-25c, 10-\$1.00)
Small (5-25c, 10-50c).

MAMMOTH WHITE

One of the very largest flowering varieties of a clear white color.

Large (10c, 10-70c); Medium (10-40c); Small (10-20c).

MARMORA

Very large smoky lavender with the habit of opening many flowers at once. It is said to be of the best.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MILDRED LOUISE

A truly wonderful variety. See complete description and prices on page 5.

Large (35c); Medium (25c); Small (15c).

MISS GREELY

Beautiful rich pink. Very much like W. H. Phipps only much earlier. See complete description and prices on page 9.

Large (12c, 10-\$1.00); Medium (10-60c); Small (10-40c).

MOROCCO

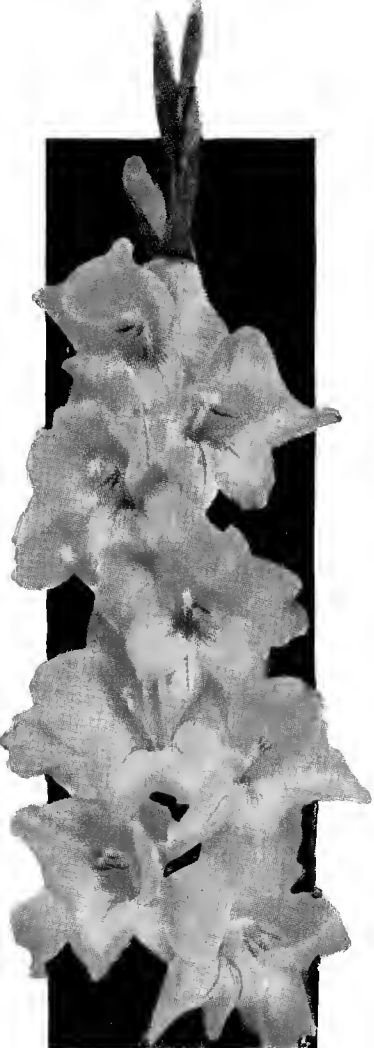

The variety that is nearly black. A very rich velvet color of outstanding beauty. See page 15 for color reproduction.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MOTHER MACHREE

A soft smoky lavender combined with orange and late.

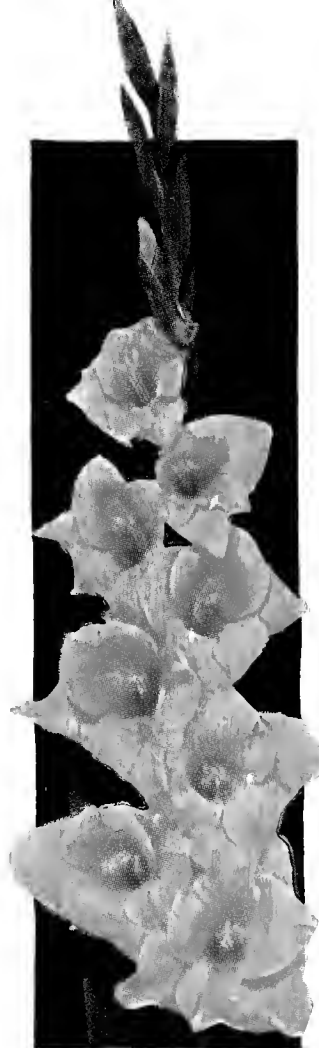

Large (10c, 10-70c); Medium (2-10c, 10-40c); Small (0-25c).

We Feature, This Year, Our Special Dollar Combination Offer:

30 ASSORTED BULBS

Look at the six beautiful Gladiolus blooms pictured on this page. Our Special Dollar Combination Offer includes 5 bulbs of each kind shown here: Betty Nuthall, Veilchenblau, Golden Dream, Morocco, Mrs. P. W. Sisson, and Mr. W. H. Phipps. Enough bulbs are included in this Special Offer for a large garden or a showy border. You will have the full range of standard Gladiolus colors. Here is an actual \$1.70 worth at our regular low prices, but offered in this SPECIAL COMBINATION, the full 30 bulbs, in 6 varieties, for

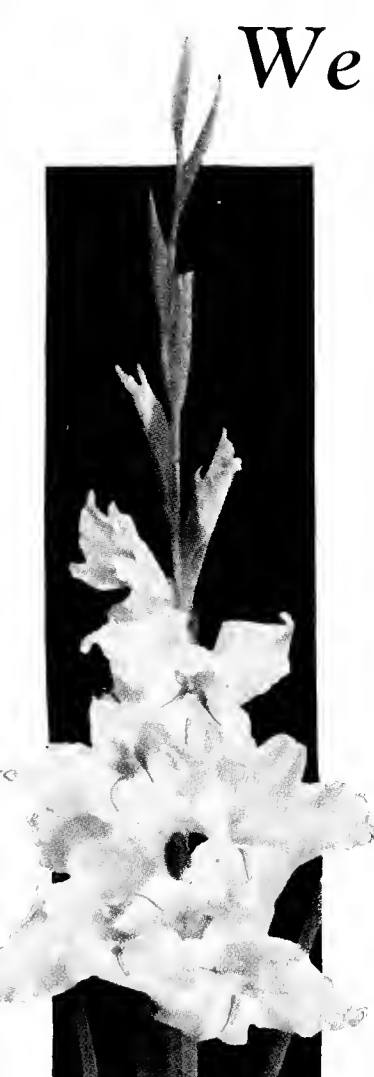

\$1

EVERY BULB SHIPPED WITH THE USUAL
WENTWORTH GARDEN GUARANTEE

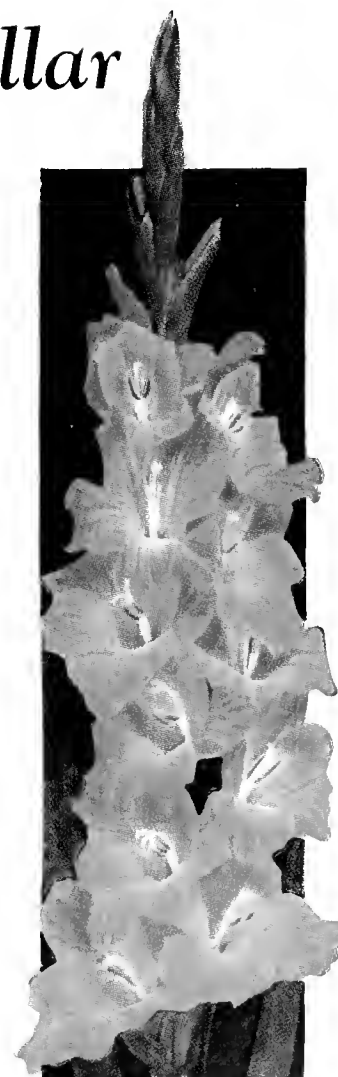

Of course, we guarantee each bulb to be of first quality and good size, and to bloom and be true to color and name — each kind is kept separate in packing. Every bulb has been grown in our own gardens under our own expert supervision and has been properly stored, graded, and fumigated.

This assortment was selected to give you a Gladiolus garden you will be proud to show your friends, and also provide you a season of satisfactory Gladiolus growing. We consider this Dollar Combination offer the outstanding Gladiolus bargain of the year.

ALL ORDERS FILLED IN THE ORDER RECEIVED

Mrs. P. W. Sisson

Mr. W. H. Phipps

MR. W. H. PHIPPS

The wonder gladiolus. A pure pink color of mammoth size and form. See page 15 for color reproduction.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MINUET

A lavender that is known as the best in its color class. There have been many new ones of this color but none have beaten this one yet.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MRS. LEON DOUGLAS

A begonia rose shade. It's not a new one but it is still winning more than its share of prizes.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MRS. P. W. SISSON

A beautiful shade of light pink. Will open many large blooms at once. See page 14 for color reproduction.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

MRS. S. A. ERREY

The largest of the orange varieties. The only thing against it is that it is apt to bleach in the sun.

Large (10c, 10-70c); Medium (10-40c); Small (10-20c).

MAID OF ORLEANS

A large tall milk white with a cream throat. Beautiful round flowers. See page 8 for complete description and prices.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (10c, 10-60c).

ORANGE WONDER

Very large orange colored gladiolus.

Large (2-12c, 10-50c); Medium (10-25c); Small (10-15c).

PELEGRINA

A very dark shade of blue with a slight red marking in the throat.

Large (20c, 10-\$1.60); Medium (15c, 10-\$1.20); Small (10c, 10-80c).

PICARDY

Beautiful shell pink color. Mammoth size and habits. See page 8 for complete description and prices.

Large (10c, 10-80c); Medium (2-10c, 10-40c); Small (10-25c).

RAMESSES

A novelty. The color is red-purple with a deep crimson blotch. Spike very tall and the florets are large and very ruffled.

Large (20c, 10-\$1.60); Medium (10c, 10-80c); Small (2-14c, 10-60c).

RED PHIPPS

A very beautiful brilliant red. See page 8 for complete prices and description.

Large (12c, 10-\$1.00); Medium (2-15c, 10-60c); Small (2-10c, 10-40c).

SOLVEIG

The new giant white that is ruffled opens wide and has many good features.

Large (each \$6.00); Medium (each \$4.00); Small (each \$2.00).

SPIRIT OF ST. LOUIS

Very good orange. Many blossoms out at a time all very well placed.

Large (2-12c, 10-50c); Medium (10-30c); Small (10-20c).

SWORD OF MOHAMMOD

A very tall smoky brown color with a rose tint overcast. Has very good spike head and flowers well placed.

Large (10c, 10-70c); Medium (10-40c); Small (10-20c).

VAN

A caramel colored gladiolus that has a small red marking. Good placement and flower head.

Large (20c, 10-\$1.60); Medium (10c, 10-80c); Small (2-14c, 10-60c).

VEICHENBLAU

Violet blue color and has good size, good coloring and is a good gladiolus. See color reproduction on page 14.

Large (2-10c, 10-40c); Medium (10-25c); Small (2-15c).

WASAGA

Buff color. Altogether different from anything you have ever seen.

Large (each 30c); Medium (each 20c); Small (2-25c).

WUERTEMBERGIA

A very large red with a white throat. Large in size and beautiful in shape.

Large (15c, 10-\$1.20); Medium (10c, 10-80c); Small (10-50c).

YVONNE

A blush pink with an overcast of silver. Large massive flowers with many out at a time.

Large (2-10c, 10-40c); Medium (10-20c); Small (10-15c).

If you have not found in the above list what you have been looking for please write to me. I grow over 300 select varieties, all of which are rather recent in introduction. I also have varieties that have not yet been placed on the market by the originator and if I still haven't what you want I can at least tell you where you can buy.

GEORGE T. WENTWORTH

OUR TULIP LIST

We have attempted to give to you a fine selection of Tulips from which to choose. None of these varieties are of the very latest introductions, though a good many are recent.

It is our object to offer you Tulips of tested color and performance at very reasonable prices. Should you desire some Tulip that is not listed below, I am confident that we can supply it at a saving to you.

TULIP CULTURE

Plant Tulips 6 to 10 inches deep in a well-worked soil.

It is advisable to enrichen the soil by mixing in bone-meal and lime.

Tulips require good drainage; so we strongly recommend that you surround the bulb by an inch or two of sand.

Never plant where the wind sweeps over the beds nor in a deep shade, if you wish the best results.

Tulip bulbs may or may not be left in the ground year 'round. If you do take them up, it is necessary to let them dry out in your basement in order to prepare for the fall replanting.

The bulbs that I am offering you are all good, healthy and guaranteed. They are especially grown for bedding or outdoor blooming and are of a size that will assure you of the greatest flower return for your money.

FINE STURDY TULIPS DARWIN

BARONNE DE LA TONNAYE.	A most satisfactory lavender pink. Height 32".	
10-40c	100-\$3.50	1000-\$30.00

10-40c	100-\$3.50	1000-\$30.00
--------	------------	--------------

GRENADIER. A very fine light orange flower. Height 19".

10-60c	100-\$4.80	1000-\$40.00
--------	------------	--------------

JOHN RUSKIN. A striking mixture of orange and yellow. Height 23".

10-60c	100-\$4.80	1000-\$40.00
--------	------------	--------------

HARDY GERMAN IRISES

WENTWORTH GARDENS present, for your convenience a very complete list of high-rated, tested Iris at exceptionally low prices.

The number that appears before the name of the varieties is the rating given this Iris by the American Iris Society.

The following are what the rating should be interpreted to mean:

95	Nearly Perfect
90	Very Fine
85	Fine
80	Very Good
70	Good
60	Good But Not Outstanding

IRIS CULTURE

German Iris can be planted in almost any desired place in your garden, though to get the best results it should be placed where it will receive perfect drainage.

Transplanting may be done at any time from full blooming season until freezing weather arrives. Many people, however, differ on this point, the reason being that some like to transplant only when they can see the colors they are moving, while others prefer the freezing time because it is then that feeding roots are started and a blooming season will not be lost.

Divide your Iris every four years. If you fail to do this, the centers will become too thick and the flowering ability of the clump will be greatly lessened. It is a good thing to remember when digging or transplanting that by allowing the roots to lie in the sun for several hours many diseases can be killed, and the plant itself will do much better for the sunning.

Every plant has its diseases and insects that live on it and it does seem as though some have more than their share. The Iris root-rot can usually be detected by the unpleasant odor. The best remedy that we know of is to dig these roots, remove all decayed parts, and then dip the remaining parts in 2 parts potassium permanganate to 1000 parts water and replant immediately. Root-rot occurs most often when the plant gets an over-abundance of moisture.

The Iris Borer is very hard to control, especially in the larger plantings. This borer is the larva of a night-flying moth and the best method known is to kill it by hand before it has reached the roots. It can be quite easily detected as it eats its way down to the roots.

Iris are a very beautiful flower and should be known as the tax payers' orchid. Every garden should have at least a few in beds or borders.

SELECT VARIETIES

5 at the 10 price; 250 at the 1000 price

"S" refers to the three standard or upright curling petals. "F" refers to the three falls or drooping petals.

- | | |

Each-15c 10-\$1.20 100-\$9.60 |
| 96 | LENT. A. WILLIAMSON. "S" very broad, soft campanula violet; "F" very large velvety royal purple. Brilliant gold beard. Massive in growth, stalk and flower. Always dependable. Early.
Each-10c 10-80c 100-\$6.40 |
| 82 | LOHENGRIN. Large handsome silvery-mauve flowers.
Each-10c 10-80c 100-\$6.40 |
| 79 | LORELEY. "S" light yellow; "F" ultramarine-blue.
Each-10c 10-80c 100-\$6.40 |
| 74 | MME. CHEREAU. Pure white with a broad and irregular border of clear blue, and borne on strong upright stems often two or three feet tall.
Each-20c 10-\$1.60 100-\$12.20 |

- 79 MRS. FRYER. "S" white shaded heliotrope; "F" purple-crimson.
Each-10c 10-80c 100-\$6.40
- 81 NEPTUNE. 38 inches. "S" bright pak blue; "F" rich dark purple. Flowers very large, borne on tall branching stems; very choice. Mid-season.
Each-15c 10-\$1.60 100-\$9.60
- 73 NIBELUNGEN. "S" fawn-yellow; "F" violet-purple with fawn margin.
Each-10c 10-80c 100-\$6.40
- 88 PALLIDA DALMATICA. One of the most beautiful of all these Iris. Perfectly hardy, strong grower, and very free-flowering. Exquisite shades of lavender-blue.
Each-15c 10-\$1.20 100-\$9.60
- 79 PARISIANA. "S" white, heavily dotted and shaded lilac; "F" white, frilled lilac at edge.
Each-5c 10-40c 100-\$3.20
- 72 PRINCESS VICTORIA LOUISE. "S" immense sulphur yellow; "F" plum color, shaded primrose.
Each-10c 10-80c 100-\$6.40
- 75 QUEEN ALEXANDRA. "S" fawn overcast with lilac shading; "F" lilac reticulated bronze at base.
Each-5c 10-40c 100-\$3.20
- 74 QUEEN OF MAY. "S" lilac-pink; "F" rich violet-purple, narrow white edge.
Each-5c 10-40c 100-\$3.20
- 81 RAFFET. Flowers uniform dark blue, the falls being striped at base with white; beard yellow. A fine late variety.
Each-5c 10-40c 100-\$3.20
- 84 RHEIN NIXE. "S" white, very large; "F" rich violet-purple, narrow white edge.
Each-10c 10-80c 100-\$6.40
- 76 SHERWIN-WRIGHT. Early. "S" and "F" splendid golden-yellow without shading or markings. Multiplies rapidly; is most satisfactory.
Each-10c 10-80c 100-\$6.40
- 76 STORMCLOUD. (Nuce d'Orage). Very large flowers of grayish slate-blue. Very fine.
Each-10c 10-80c 100-\$6.40
- 80 VIOLACEA GRANDIFLORA. "S" and "F" clear violet-blue. The best true blue.
Each-5c 10-40c 100-\$3.20
- 84 W. J. FRYER. "S" large bright yellow; "F" large deep maroon with narrow yellow border; center shaded violet.
Each-5c 10-40c 100-\$3.20
- 57 WALHALLA. "S" lavender; "F" wine red. A strong grower and free bloomer.
Each-10c 10-80c 100-\$6.40

DELPHINIUM SEED

WENTWORTH GARDENS imports for your convenience as fine a list of English Hybrid Delphinium Seed as could be desired.

It is true that not all Delphinium seed will come true to name, but we guarantee that every step possible is taken by the English growers to assure you of the greatest per cent of the seed coming true to the mother plant.

CULTURE OF DELPHINIUM SEEDS

In planting the seeds you can never be too careful, though reports of fine results from most indifferent care are often heard. I am sure, however, that you will find it to your advantage to follow the suggestions given below.

Be sure that the flats you are using have good drainage.

Fill flat with a well sifted sandy loam and leaf mold or peat mixture. Be sure the dirt is level so as to insure against water standing in any one place.

Next plant your seed and cover with a cloth.

Keep soil well moist but not wet for too much water will tend to rot the seeds.

After the appearance of the third or fourth leaves, transplant into frames where there is good garden soil with fertilizer already mixed in. This procedure will insure a strong and rapid root growth.

SYMBOLS USED IN LIST

Early, Medium, Late — mean the season in which the plants bloom.

B. D. S. — British Delphinium Society Award.

R. H. S. — Royal Horticultural Society Award.

F. C. C. — First Class Certificate.

A. M. — Award of Merit.

GROWER'S DESCRIPTION OF MOTHER PLANT

BLUE GOWN, perfect ultramarine blue self, semi-double with small black eye, shapely spike of open formation; plant free and graceful with good secondary spikes.

F. C. C., B. D. S. 5½ ft. Early. \$3.50 per pkt.

COUNTESS COWLEY, light blue and mauve semi-double of fine form, eye black. Magnificent spike. F. C. C.,

R. A. S., 5 ft. Late \$1.20 per Pkt.

D. B. CRANE, deep lavender semi-double, shades of blue, small white eye. Extra large flowers, massive spike.

A. M., R. H. S., 5½ ft. Mid-season. \$1.20 per Pkt.

DONALD ALLAN, semi-double, bright azure-blue, eye white. The flowers are of good size and substance while the spike is very shapely, broad at base and tapering to a point. 5 ft. Late. . . . \$3.50 per Pkt.

DUCHESS OF PORTLAND, semi-double, ultramarine-blue, small white eye — a truly wonderful color, and with well-shaped flowers. 5½ ft. Mid.

\$3.50 per Pkt.

- EDWARD BROMET, purplish blue ground shade is richer, and a large white eye. A. M. 5 ft. Mid. \$1.20 per Pkt.
- GERALD HOWSE, semi-double, deep blue sepals, inner petals purple-rose, black eye. An excellent spike displays to best advantage the large well-formed flowers. 5 ft. Late. \$3.50 per Pkt.
- GRAHAM SETON, semi-double, rich ultramarine blue, light shades of rosy purple, small white eye, good spike, remarkable lasting qualities. Vigorous. A. M., B. D. S., A. M., R. H. S. 5½ ft. Mid. \$1.20 per Pkt.
- LADY CLARA, deep mauve self, with flowers of exceptional form and substance, eye white. Massive pyramidal spike, a grand variety. 5½ ft. Late. \$3.50 per Pkt.
- LADY ELEANOR, sky-blue with light shades of pale mauve, the blue predominating; flowers double, inner petals being waved gives a wonderful effect on long shapely spikes. Free habit. A. M., B. D. S., F. C. C., B. D. S. 6 ft. Mid. \$3.50 per Pkt.
- LADY MAY, beautiful large flowers, delicate bluish mauve, on long pedicels. A. M., B. D. S., 4½ ft. Mid. \$1.20 per Pkt.
- LADY TERESA, deep rose purple, extra large semi-double flowers, eye white with violet stripes. Long shapely spikes, bold habit. A. M., B. D. S. 6 ft. Mid. \$1.20 per Pkt.
- MRS. J. S. COURTLAUD, sky-blue, semi-double, faintly touched mauve, eye white, long spike. A vigorous plant of splendid decorative qualities and mildew free. 8 ft. Mid. \$3.50 per Pkt.
- MRS. P. NELKE, bright cornflower-blue, semi-double, inconspicuous white eye. Habit free and branching. A. M., B. D. S. 5½ ft. Mid. \$1.20 per Pkt.
- PHILIP BUTLER, semi-double, deep blue, occasionally lightly shaded rose. Excellent spike. Robust. 5½ ft. Mid. \$1.20 per Pkt.
- ROBBIE, light silvery-blue, semi-double, exquisitely formed large flowers, fine substance; black eye regularly striped with mauve, very distinct. Medium length spike, well spaced. 5½ ft. Mid. \$3.50 per Pkt.
- ROMEO, semi-double, rich gentian-blue, small black eye; long cylindrical spike with flowers rather thinly spaced. A variety of real decorative value much admired by us. R. H. S. 5 ft. Mid. . . . \$1.20 per Pkt.
- SIR NEVILLE PEARSON, extra large shapely semi-double, deep blue sepals, petals rosy-purple, black eye. Long, well-proportioned spike; extremely fine. 5½ ft. Mid. \$3.50 per Pkt.
- VIOLET ROBINSON, rich violet-blue, moderate sized white eye, and remarkable for size of flowers, often 3 inches across. A. M., R. H. S., A. M., B. D. S. 4 ft. Early. \$1.20 per Pkt.

SELECT PEONIES

No flower grown by man has been blessed with such colorful large blooms, such luxurious dark green foliage, and still requires so little care as the peonies.

WENTWORTH GARDENS have one of the very best collections of high-rated peonies on the market. The rating numbers given each variety by the American Peony Society stand for the following:

- 10 — Perfect
- 9.0 — Exceptionally Good
- 8.0 — Very Good
- 7.0 — Good

Here are some helpful hints for better Peony culture.

First of all, Peonies may be planted in almost any ordinary garden soil and in almost any place, but it is better not to place them too near trees or large shrubs as these tend to drain the soil of moisture as well as rob the Peony of a few hours of sunshine.

Never plant a root so that the eyes are more than 2½ inches below the surface — two inches is the most satisfactory depth. Too deep planting is one of the commonest reasons for failure to get blooms.

The best times for planting are from early September until freezing time and in the early Spring when the ground first becomes workable.

When planted in groups Peonies should be spaced about two-thirds of the potential length of their stems.

Peonies are remarkably free from diseases and blights. The ants and other bugs that swarm about the buds are merely after the honey and do not damage the plant in any way.

We have listed below our Peony stock accompanied by helpful notations as color, price, etc. for your convenience. OUR SHIPMENTS ARE ALL THREE TO FIVE EYE DIVISIONS. THEY ARE ALWAYS TRUE TO NAME.

WHITES

5 at the 10 price

- 9.3 FESTIVA MAXIMA. Early. A white with carmen flecked center. Very fragrant.
Each-50c 10-\$4.00
- 9.2 GRACE LOOMIS. Midseason. A very exquisite pure white.
Each-\$2.00 10-\$16.00
